KF 640 & 640T

Digital booklet making system comprising of a booklet maker and trimmer, produces large format booklets.

With digital printing presses now more commonly able to print longer sheet lengths (alongside existing litho solutions), the ability to finish short volume larger format books is becoming increasingly requested.

The KF 640 & 640T is a compact booklet making system. Designed and built for those looking to produce large format booklet work as well as their existing SRA3 output.

Simple to use and reliable, the KF 640 can cater for the very lowest of bespoke run lengths to larger digital and litho work.

So what can it do?

- Produce max booklet size of 320mm x 320mm – including the more common larger sizes of A4 landscape and 12" x 12"
- Max sheet size 640mm x 320mm
- Min sheet A5
- Ergonomic design, for comfortable hand feeding
- Quick and simple paper size change over – no tools required
- Compatible with optional squarefold units to give booklet a squared spine finish

10 REASONS WHY CHOOSE THE KF 640 & 640T

1. The world's first hand fed 640mm sheet length bookletmaker, designed to work with digital and litho output
2. Cost effective investment
